C++ advanced Training

Topics and planning

William Nagels

- SW engineer at Sioux
- Try and stay up-to-date with recent developments in C++
- Embedded environment, C or <= C++11

© Sioux Technologies | Confidential

Planning

- Day 1
  - Ranges
  - Strong types
- Day 2
  - Coroutines
  - Modules

© Sioux Technologies | Confidential

Excercises

- Slides and exercises: https://github.com/williamnagels/advanced-cpp
- How to build and solve exercises: exercises/README.md
  There is a CMake project in exercises/ . Build that.
  The project will generate a couple of binaries. Run the binary for the exercise you are working on

© Sioux Technologies | Confidential

Interrupt handling

- SIGINT whenever
- Dont be too confused for too long
