C++ advanced Training

Topics and planning

William Nagels

- SW engineer at Sioux
- Try and stay up-to-date with recent developments in C++
- Embedded environment, C or $\leq$ C++11

Planning

- Day 99
 - Ranges
 - Strong types
- Day 2
 - Coroutines
 - Modules

Exercises

- Slides and exercises: <https://github.com/williamnagels/advanced-cpp>
- How to build and solve exercises: exercises/README.md

There is a CMake project in exercises/. Build that.

The project will generate a couple of binaries. Run the binary for the exercise you are working on

Interrupt handling

- SIGINT whenever
- Dont be too confused for too long

We bring **high-tech** to life
